

Project Management And Best Practices

Project management is the practice of leading the work of a team to achieve goals and meet success criteria at a specified time

The primary challenge of project management is to achieve all of the project goals within the given constraints

How are your projects looking?

Are your projects normally completed successfully on time?

Are they controlled through a strict, speedy and proven project methodology standard?

Is all your documentation up to date and based on Best Practice principles?

What about audit compliance?

Will your project documentation stand up to their requirements and standards?

This training course is all about
Project Management and Best Practices
and starts from the basis of PAS 55
The world and industry benchmark standard

Welcome to Project Management

Module 1 - PAS 55 and Benchmarking

The International Benchmark Publication for Project Methodologies. A high level overview

Module 2 - Create Your Own Process

Individual organisations need to compile their own methodology that is specific to their organisation. Learn a unique 7 step process plan

Module 3 - Prepare Your Journey

To prepare your journey, you will need a plan. Project Planning puts together a plan as a control mechanism

Module 4 - Just Do It

Implementation has far-reaching effects
Good implementation provides a strong foundation
Poor implementation has severe negative

Module 5 - Best Practices

Best Practices an integral part of everything we have discussed in all the Modules in this series
Nothing is better or exceeds a Best Practice

Module 6 - Process Mapping

Business process mapping refers to activities involved in defining what a business entity does
